EDUCATION

University of Illinois at Urbana-Champaign | *Bachelor of Science in Computer Engineering* **May 2025**
Minor in Game Studies & Design **GPA: 3.64/4.00**

Relevant Coursework: Data Structures & Algorithms, Software Engineering I, Intro Video Game Dev Process, Operating Systems, Artificial Intelligence, Applied Machine Learning, Database Systems

SKILLS

Languages: C, C++, C#, Python, MySQL, HTML, CSS, JavaScript, TypeScript

Engines/Tools: Unreal Engine, Unity, Blender, CAD, Visual Studio, Git, GitHub, Perforce, React

Workflow: Agile, Jira, Trello, Asana

WORK EXPERIENCE

Digital Scorpion Interactive - *Computer Graphics Programmer* Remote - Contract | Aug 2025 – Present

- Crafting **UI** systems and cosmetic fixes in **Unreal Engine 5 (C++)** and **Blueprints** for *Frogdoku*, enhancing player readability while ensuring consistent visual polish across the game
- Supporting both art and dev teams by debugging **10+ UI/graphics issues** and resolving technical bottlenecks, streamlining and accelerating **QA** testing toward launch readiness

The stu/dio at Illinois (*Work-for-hire studio through UIUC*) - *Programmer* Champaign, IL | Sep 2024 – Present

- Implemented **VR** educational simulator in **Unreal Engine (C++)**, adding excavation mechanics and custom **UI/UX** widgets that cut cognitive load by **~25%** and improved accessibility for diverse users of Meta Quests
- Facilitated playtests with **30+** students/instructors, leveraging **Agile methodology** and **Jira** tracking to translate feedback into a **40%** drop in repeat usability issues

Brunswick Corporation - *Computer Graphics Developer Intern* Champaign, IL | Jan 2025 – July 2025

- Engineered a boating simulator in **Unreal Engine 5 (C++)**, refining **CAD** assets in **Blender** and integrating WebSocket HMI + **UI/UX** that boost interactivity by **40%** and showcase the future of boating at CES 2026
- Coordinated within **Agile** workflows in **Asana** and **Perforce** with engineers, artists, and UX, streamlining iteration cycles by **20%** and delivering features that balanced technical feasibility with business goals
- Simulated autonomous boat docking in **Python** by applying **AI-driven** feedback loops for high-fidelity testing

Iron Galaxy Studios - *Software Engineer Intern* Chicago, IL | May 2023 – Aug 2023

- Introduced to **Unreal Engine 4 (C++)** through a 3D action rogue-like course project, creating **5+ player abilities**, implementing UI widgets, and debugging **10+ gameplay issues** to improve responsiveness by **20%**.
- Built a soccer shooting game in **EASy68K assembly** in **6 weeks**, demonstrating **low-level programming** skills

PROJECTS

MixSpace – *Programmer* [**Python, TypeScript, HTML, CSS, Java, Hackathon**] Champaign, IL | July 2025

- Built a crowd-powered music system that curated real-time playlists for public space integrating **Spotify's API**, **LLMs**, and user data, delivering a functional demo in under **13 hours**
- Spearheaded collaboration with a **team of 6** to design and implement features, achieving a **30%** boost in engagement during live testing and showcasing **strong product vision** and **rapid execution**

StopQuest – *Programmer* [**Python, MySQL, React, Pandas**] Champaign, IL | July 2024– Aug 2024

- Designed a **React**-based trip planner with **API** integration and state management, improving scheduling efficiency by **30%** and enabling users to plan activities and attractions before flights
- Developed a **Python** backend with **Pandas** to process **1,000+ route options**, applying **Dijkstra's pathfinding** to fit activities within deadlines and using **MySQL** for fast data storage and queries
