EDUCATION

University of Illinois at Urbana-Champaign | Bachelor of Science in Computer Engineering May 2025
Minor in Game Studies & Design GPA: 3.64/4.00

Relevant Coursework: Data Structures & Algorithms, Software Engineering I, Intro Video Game Dev Process,
Operating Systems, Artificial Intelligence, Applied Machine Learning, Database Systems

SKILLS

Languages: C, C++, Python, HTML, CSS, JavaScript, TypeScript, C#, SQL

Cloud & Systems: Google Cloud, AWS, Linux CI/CD

Frameworks & Tools: React, Pandas, Git, GitHub, Perforce, Unreal Engine 5, Unity, CI/CD

WORK EXPERIENCE

Digital Scorpion Interactive – Gameplay Programmer Remote - Contract | Aug 2025 – Present

- Architected core gameplay systems in **Unreal Engine 5 (C++)** for a commercially released **Steam** title, *Frogdoku*, developing scalable UI, persistence systems, and event-driven player feedback
- Drove the studio's migration from **Perforce to GitHub**, reducing integration conflicts by **~30%** and improving development workflow efficiency within active production cycles
- Delivered gameplay features for major updates, partnering with cross-functional teams to ship new content

Brunswick Corporation - Computer Graphics Developer Intern → Contract Champaign, IL | Jan 2025 – Dec 2025

- Engineered an interactive boating simulator in **UE5 (C++)**, leveraging **Blender** for environment assets and integrating a **Python** WebSocket-driven HMI and UI/UX supporting **1,000+** booth interactions at CES 2026
- Facilitated cross-team technical discussions to drive project direction, coordinated feature delivery through **Agile** workflows in **Asana**, aligning engineering efforts with product and business goals

The stu/dio at Illinois (Work-for-hire studio through UIUC) – Programmer Champaign, IL | Sep 2024 – Oct 2025

- Implemented a **VR** excavation simulator in **Unreal Engine 5(C++)**, developing custom **UI/UX** widgets and interaction systems to reduce cognitive load and improve accessibility for users on Meta Quest
- Translated playtest feedback from **20+** students and instructors into product improvements, driving a **40%** reduction in repeat usability issues while coordinating workflows through **Perforce**

Iron Galaxy Studios - Software Engineer Intern Chicago, IL | May 2023 – Aug 2023

- Developed a 3D action roguelike in **Unreal Engine 4 (C++)**, implementing 5+ player abilities and enemy AI behaviors using object-oriented design to deliver a functional combat and progression prototype
- Built a soccer shooting game in **EASy68K assembly** in **6 weeks**, demonstrating **low-level programming** skills

PROJECTS

Wide Asleep – Programmer & Project Lead Champaign, IL | Jan 2025 – May 2025

- Defined gameplay architecture through **technical design documentation** covering inventory, player controls, and usable item systems, implementing these systems in **Unreal Engine 5**
- Led a **6-person team** through full-cycle production, assigning tasks, tracking sprint progress in **Jira**, and managing scope to deliver a playable prototype

The Shifter - Lead Programmer & Project Manager Game Jam | July 2024– Aug 2024

- Learned **Blender** in **two weeks** to model and animate **85% of in-game assets**, integrating them into **Unreal Engine 5** to support a cohesive gameplay experience under tight game jam constraints
- Managed a **3-person team** through a **2-week** game jam, coordinating development in **Trello** to streamline workflows and ship a fully playable prototype on deadline
