## EDUCATION

University of Illinois at Urbana-Champaign | Bachelor of Science in Computer Engineering May 2025  
Minor in Game Studies & Design GPA: 3.64/4.00

Relevant Coursework: Data Structures & Algorithms, Software Engineering I, Intro Video Game Dev Process,  
Operating Systems, Artificial Intelligence, Applied Machine Learning, Database Systems

## SKILLS

Languages: C, C++, C#, Python, MySQL, HTML, CSS, JavaScript, WebGL2

Engines/Tools: Unreal Engine 5, Unity 3D, Blender, Visual Studio, Git, GitHub, Perforce, MS Office

Workflow: Agile, Jira, Trello, Asana

## WORK EXPERIENCE

Digital Scorpion Interactive - Game & Graphics Programmer Remote - Contract | Aug 2025 – Present

- Coordinating with artists, designers, and engineers to maintain production stability across UI, gameplay, and assets and support the successful launch of a commercial **Steam** title
- Supporting the studio's migration from **Perforce** to **GitHub**, troubleshooting source control conflicts, resolving pipeline issues, and fixing bugs introduced by merge and versioning errors
- Conduct **3+ interviews** for developer and artist roles, helping guide hiring decisions with structured feedback

The stu/dio at Illinois (Work-for-hire studio through UIUC) – Programmer Champaign, IL | Sep 2024 – Oct 2025

- Implemented a VR excavation simulator in Unreal Engine (C++), developing custom UI/UX widgets and interaction systems to reduce cognitive load and improve accessibility for users on Meta Quest
- Facilitated playtests with **20+** students/instructors, applying **Agile** practices and **Jira** tracking to translate feedback into a **40%** reduction in repeat usability issues, while coordinating workflows through **Perforce**

Brunswick Corporation - Computer Graphics Developer Intern Champaign, IL | Jan 2025 – July 2025

- Engineered an interactive boating simulator in UE5 (C++), leveraging **Blender** for environment assets and integrating a **Python** WebSocket-driven HMI and UI/UX used by over **1,000 daily users** at CES 2026
- Led cross-team meetings to drive technical direction, prepared executive demos, and coordinated feature delivery using Agile workflows in **Asana**, aligning development with product and business goals

Iron Galaxy Studios - Software Engineer Intern Chicago, IL | May 2023 – Aug 2023

- Built a 3D action roguelike in **Unreal Engine 4 (C++)**, implementing 5+ player abilities and enemy behaviors using object-oriented design, resulting in a prototype with combat and progression systems
- Built a soccer shooting game in **EASy68K assembly** in **6 weeks**, demonstrating **low-level programming** skills

## PROJECTS

Frogdoku – Game & Graphics Programmer Remote | Aug 2025 – Present

- Owned the design and implementation of the full UI/UX system for a shipped **Steam** title, building reusable components in **UE5 (UMG + C++)** across menus, HUD, game states, and puzzle feedback systems
- Developed and debugged puzzle systems and progression logic, stabilizing win conditions and resolving gameplay edge cases through polish and QA passes across release builds

The Shifter - Lead Programmer & Project Manager Game Jam | July 2024– Aug 2024

- Learned **Blender** in **two weeks** to model and animate **85% of in-game assets**, ensuring seamless integration into **UE5** under strict game jam constraints
- Managed a **3-person team** during a **2-week game jam**, delegating tasks and tracking progress with **Trello**, which accelerated development cycles and enabled delivery of a finished prototype under deadline
