EDUCATION

University of Illinois at Urbana-Champaign | *Bachelor of Science in Computer Engineering* **May 2025**
Minor in Game Studies & Design **GPA: 3.64/4.00**

Relevant Coursework: Data Structures & Algorithms, Software Engineering I, Intro Video Game Dev Process, Operating Systems, Artificial Intelligence, Applied Machine Learning, Database Systems

SKILLS

Languages: C++, Python, TypeScript, JavaScript, C#, MySQL

Engines/Tools: Unreal Engine 5, React, Git, GitHub, Perforce, Linux, Google Cloud

Workflow: Agile, Jira, Trello, Asana, CI/CD

WORK EXPERIENCE

Digital Scorpion Interactive – *Software Engineer (Graphics & Systems)* Remote - Contract | Aug 2025 – Present

- Coordinating with artists, designers, and engineers to maintain production stability across UI, gameplay, and assets and support the successful launch of a commercial **Steam** title
- Supporting the studio's migration from **Perforce** to **GitHub**, troubleshooting source control conflicts, resolving pipeline issues, and fixing bugs introduced by merge and versioning errors

Brunswick Corporation - *Computer Graphics Developer Intern* → *Contract* Champaign, IL | Jan 2025 – Dec 2025

- Engineered an interactive boating simulator in UE5 (C++), leveraging **Blender** for environment assets and integrating a **Python** WebSocket-driven HMI and UI/UX used by over **1,000 daily users** at CES 2026
- Led cross-team meetings to drive technical direction, prepared executive demos, and coordinated feature delivery using Agile workflows in **Asana**, aligning development with product and business goals

The stu/dio at Illinois (*Work-for-hire studio through UIUC*) - *Programmer* Champaign, IL | Sep 2024 – Oct 2025

- Implemented a VR excavation simulator in Unreal Engine (C++), developing custom UI/UX widgets and interaction systems to reduce cognitive load and improve accessibility for users on Meta Quest
- Facilitated playtests with **20+** students/instructors, applying **Agile** practices and **Jira** tracking to translate feedback into a **40%** reduction in repeat usability issues, while coordinating workflows through **Perforce**

PROJECTS

Frogdoku – *Software Engineer [C++, Unreal Engine 5]* Remote | Aug 2025 - Present

- Owned the design and implementation of the full UI/UX system for a shipped **Steam** title, building reusable components in **Unreal Engine 5 (C++)** across menus, HUD, game states, and puzzle feedback systems
- Developed and debugged puzzle systems and progression logic, stabilizing win conditions and resolving gameplay edge cases through polish and QA passes across release builds

MixSpace – *Programmer [Python, TypeScript, HTML, CSS, JavaScript, Hackathon]* Champaign, IL | July 2025

- Built a crowd-powered music system that curated real-time playlists for public space integrating **Spotify's API**, **LLMs**, and user data, delivering a functional demo in under **13 hours**
- Spearheaded collaboration with a **team of 6** to design and implement features, achieving a boost in engagement during live testing and showcasing **strong product vision** and **rapid execution**

StopQuest – *Programmer [Python, MySQL, React, Pandas]* Champaign, IL | July 2024– Aug 2024

- Designed a **React**-based trip planner with **API** integration and state management, improving scheduling efficiency and enabling users to plan activities and attractions before flights hosted on **Google Cloud**
- Developed a **Python** backend with **Pandas** to process **1,000+ route options**, applying **Dijkstra's pathfinding** to fit activities within deadlines and using **MySQL** for fast data storage and queries
